4000 Hojas.

4 Rolls Toilet Paper
4000 Ply Sheet

CORN STARCH CONTAINERS

REDUCE YOUR CARBON FOOTPRINT - food containers are made from cornstarch, a renewable resource, and small percentage of petroleum based material for durability and strength, and with its proprietary additive helps reduce your carbon footprint!

LEAK & SOAK RESISTANT - No more worries about food liquids seeping through while on-the-go and staining your favorite pants and car seat! You can carry these containers anywhere, anytime, anyplace without any mess! Unlike other alternatives such as paper-based containers which leak and break apart constantly.

NON-STICK SURFACE AND PREMIUM QUALITY CONTAINERS – eco-friendly containers are durable, strong, and secured with a satisfying slit-in front closing mechanism. Also, you can enjoy all of your meals without worrying about your portions being stuck to the bottom of the containers due to its non-stick surface material.

ELEGANT & VERSATILE DESIGN - The cornstarch food container has an elegant ivory or beige color that is perfect for both hot and cold foods for different occasions.

MICROWAVE & FREEZER SAFE - It can withstand temperatures from -4 to 200 degrees Fahrenheit.
